

B&P Vending Response to COVID-19

Safely Serving Our Communities

COVID-19 has had a tremendous impact on nearly every aspect of our daily lives. At B&P, we want to assure you that the health and safety of our employees and customers remains our #1 priority.

On-site vending machines and micro markets provide employees a safe and effective way to purchase lunches, snacks, and beverages in a contactless, controlled manner, while eliminating the need for employees to travel off-site, engage in additional personal contact, and risk returning to work and exposing their colleagues.

Following in part is what we are doing to maintain the safety of your on-site vending machines and micro markets, and help ensure the wellbeing of you and our employees:

Maintaining The Highest Cleanliness Standards

- Enhanced cleaning protocols
- Continual wipe down of machines and equipment using a sanitizer product that works to kill viruses long after applied
- Frequent cleaning of our trucks, including cab and box

Keeping Our Employees Healthy

- Temperature screenings logged daily
- Hand sanitizer in each vehicle and throughout facility
- Gloves and masks provided for delivery drivers
- Daily UV light disinfection of handhelds and keys

If you have any questions about our COVID-19 protocols, you may contact us at 360-734-7631.

Thank you for your partnership and support, please stay safe and healthy.
